User Guideline

Complete guide to managing your e-commerce store

Version 1.0 • June 2026

CartLite — Lightweight Laravel E-commerce Solution

Table of Contents

- 1. Accessing the Admin Panel
- 2. Dashboard Overview
- 3. Managing Products
- 4. Managing Categories
- 5. Managing Orders
- 6. Managing Inventory
- 7. Managing Users
- 8. Reports & Analytics
- 9. Invoice Generation
- 10. User Roles & Permissions
- 11. Troubleshooting

1. Accessing the Admin Panel

1.1 Login

Step 1: Open your browser and navigate to:
`https://yourdomain.com/login`

Step 2: Enter your registered email address and password.

Step 3: Click the "Sign In" button.

Note: If you are the super admin, you will be automatically redirected to the admin dashboard. Regular customers are redirected to the homepage.

1.2 Default Credentials

Role	Email	Password
Super Admin	admin@gmail.com	password
Admin	+8801712345678	password

Important: Change the default password immediately after your first login for security purposes.

2. Dashboard Overview

The dashboard provides a real-time snapshot of your store's performance. It auto-refreshes every 30 seconds.

2.1 Statistics Cards

The top section displays key metrics:

- **Total Revenue** — Total sales revenue across all completed orders
- **Total Orders** — Number of orders placed
- **Total Products** — Active products in your catalog
- **Total Customers** — Registered user accounts

2.2 Order Status Breakdown

Quick overview of order counts by status: pending, confirmed, processing, shipped, delivered, cancelled, refunded.

2.3 Recent Orders

The last 5 orders are displayed for quick access. Click any order number to view its details.

2.4 Low Stock Alerts

Products that have fallen below their low-stock threshold are listed here. Click the "**Manage Inventory**" link to update stock levels.

2.5 Revenue Chart (7 Days)

A line chart showing daily revenue for the past 7 days, helping you track short-term sales trends.

Tip: Use the dashboard as your daily starting point. Check low stock alerts first, then review recent orders.

3. Managing Products

3.1 Product List

Navigate to **Products** in the sidebar. The product list shows:

- Product name, SKU, category
- Selling price and compare price
- Stock quantity
- Active/Inactive status
- Actions: Edit, Delete

3.2 Search & Filter

- **Search:** Type product name or SKU in the search box
- **Category Filter:** Select a category from the dropdown
- **Status Filter:** Show active, inactive, or all products

Results update automatically as you type or select filters (HTMX-powered).

3.3 Creating a New Product

Step 1: Click the **"Add New Product"** button at the top of the products page.

Step 2: Fill in the required fields (marked with *):

- **Product Name** — The display name (slug is auto-generated)
- **Category** — Select from the dropdown
- **Selling Price** — The price customers pay
- **SKU** — Stock Keeping Unit (must be unique)

Step 3: Fill optional fields as needed:

- **Short Description** — Brief product summary (shown in listings)
- **Description** — Full product details (shown on product page)
- **Compare Price** — Original/crossed-out price for discount display
- **Cost Price** — Your purchase cost (for profit calculation)
- **Badge** — e.g., "New", "Sale", "Best Seller"

Step 4: Upload a **main image** and optionally additional **gallery images**.

Step 5: Toggle **"Featured"** if the product should appear in the featured section.

Step 6: Set **Stock Quantity** and **Low Stock Threshold**.

3.4 Editing a Product

Click the **"Edit"** button next to any product. The form is pre-filled with existing data. Make your changes and click **"Update"**.

3.5 Deleting a Product

Click the **"Delete"** button. A confirmation dialog will appear. Products are soft-deleted (can be recovered from the database if needed).

Warning: Deleting a product will not affect existing orders that contain this product, but it will remove it from the storefront immediately.

4. Managing Categories

Navigate to **Categories** in the sidebar. Categories help organize products and make them easy to find.

4.1 Creating a Category

Step 1: Click **"Add New Category"**.

Step 2: Enter the **Category Name** (slug is auto-generated).

Step 3: Optionally add a **Description**, **Image**, and set a **Parent Category** for hierarchy.

Step 4: Set **Sort Order** to control display position (lower numbers appear first).

Step 5: Toggle **Active** to enable/disable the category.

Step 6: Click **"Save"**.

Tip: Use parent categories to create a hierarchy. For example: "Furniture" → "Chairs", "Tables", "Sofas".

5. Managing Orders

5.1 Order List

Navigate to **Orders** in the sidebar. The order list shows:

- Order number (format: HI-YYYYMMDD-XXXXXX)
- Customer name and phone
- Order total
- Current status (color-coded badge)
- Date placed
- Actions: View Detail, Invoice

5.2 Search & Filter

- **Search:** Type the order number to find a specific order
- **Status Filter:** Filter orders by their current status

5.3 Order Detail & Status Update

Step 1: Click on any order number or the **"View"** button.

Step 2: Review the order details:

- **Order Items:** Products purchased, quantities, unit prices

- **Shipping Info:** Customer name, phone, address, city
- **Payment Info:** Payment method, transaction ID, amount
- **Order Summary:** Subtotal, discount, shipping, total

Step 3: To update the order status, select a new status from the dropdown and click **"Update Status"**.

5.4 Status Transition Side Effects

Status Change	Automatic Action
Pending → Confirmed	No side effect
Confirmed → Processing	No side effect
Processing → Shipped	No side effect
Shipped → Delivered	Payment marked as completed
Any → Cancelled	Inventory restored, sold_count decreased, payment marked refunded
Any → Refunded	Inventory restored, sold_count decreased, payment marked refunded

Important: Changing to "Cancelled" or "Refunded" will automatically restore product inventory. Only change to these statuses when the order is actually cancelled/refunded.

6. Managing Inventory

Navigate to **Inventory** in the sidebar. This section shows all products with their current stock levels.

6.1 Viewing Inventory

- Search by product name or SKU
- Each row shows: product name, SKU, current quantity, low stock threshold, warehouse location
- Products below threshold are visually highlighted

6.2 Updating Stock

Step 1: Click the **"Edit"** button next to the product.

Step 2: Update the **Quantity** field with the current stock count.

Step 3: Adjust the **Low Stock Threshold** if needed (default: 10).

Step 4: Change **Warehouse Location** if applicable.

Step 5: Click **"Update"** to save changes.

Note: Inventory is automatically deducted when an order is placed and restored when an order is cancelled/refunded. Manual updates should only be used for stock corrections or restocking.

7. Managing Users

Navigate to **Users** in the sidebar. This section lists all registered users.

- Search users by name or email
- View user role, email, phone, and last login date
- Users cannot be edited or deleted from this panel (for security)

8. Reports & Analytics

Navigate to **Reports** in the sidebar. Access detailed sales analytics:

8.1 Date Range Selection

Choose from three preset date ranges: **7 Days**, **30 Days**, or **12 Months**.

8.2 Report Sections

- **Summary Metrics:** Total revenue, total orders, active products, total customers, average order value
- **Revenue Growth:** Percentage change compared to the previous period

- **Daily Sales Chart:** Bar chart showing revenue per day
- **Top Products:** Top 5 products by quantity sold
- **Category Breakdown:** Revenue split by product category
- **Payment Methods:** Revenue split by payment method (COD, bKash, Nagad)

Tip: Use the 12-month view for strategic planning and the 7-day view for day-to-day operations.

9. Invoice Generation

Each order has a printable invoice available from two locations:

9.1 From Order List

Click the **document icon** () in the Actions column of the orders table.

9.2 From Order Detail

Click the **"Generate Invoice"** button at the top of the order detail page.

9.3 Invoice Features

- Brand header with store name
- Order number and date
- Customer shipping information
- Itemized table with product names, quantities, unit prices, and totals
- Order summary (subtotal, shipping, total)
- Payment method and status
- Status badge (color-coded)
- Print button for physical copies

Tip: Use the browser's print function (Ctrl+P / Cmd+P) to save the invoice as PDF or print it.

10. User Roles & Permissions

Role	Access Level
Super Admin	Full system access. Can manage all settings, users, and data.
Admin	Manage products, orders, inventory, coupons, reviews, payments. Read users and audit logs.
Manager	Limited management: read/update products, read categories, read/update orders, read/update inventory, read reviews.
Customer	Shop and place orders. Manage own cart and orders. Submit reviews.

11. Troubleshooting

Issue: Cannot log in

- Verify your email and password are correct
- Check that caps lock is off
- Contact the super admin to reset your password

Issue: Product not showing on storefront

- Check that the product status is set to **Active**
- Verify the product's category is also **Active**
- Check that stock quantity is greater than 0

Issue: Order showing wrong status

- Refresh the page (HTMX auto-refresh may have been interrupted)
- Check the order detail page for the latest status

Issue: Inventory not deducting after order

- Inventory is deducted at the time of checkout, not delivery
- Check if the product has sufficient stock
- Verify the inventory record exists for the product
