Start selling online today

Everything You Need to Sell Online

Product Management

Add, edit, organize products with categories, images, SKUs, badges, and pricing. Feature products, set discounts, manage variants.

Shopping Cart & Checkout

Full cart system with guest & logged-in user support. Quick buy pages for social media campaigns. One-page checkout with city selection.

Order Management

Track orders from pending to delivered. Cancel/refund with automatic inventory restore. Search, filter, and status updates with smart side effects.

Inventory Tracking

Real-time stock tracking with low-stock alerts. Auto-deduct on order placement, restore on cancellation. Warehouse location support.

Payment Methods

Cash on Delivery, bKash, Nagad — the most popular payment options in Bangladesh. Visa/Mastercard schema ready for future integration.

Invoice Generation

Printable invoices with brand header, itemized order table, payment status, and shipping details. One-click print from admin panel.

Reports & Analytics

Sales reports with daily revenue charts, top products, category breakdown, payment method analysis, and period-over-period growth comparison.

Role-Based Access

Super admin, admin, manager, and customer roles with granular permissions. Full audit logging for all admin actions.

Bonus Features (Included)

- ✓ Coupon / Discount system with usage limits and expiry dates
- ✓ Product reviews & ratings with approval workflow
- ✓ Audit logs — track every admin action
- ✓ User notifications — order & stock alerts
- ✓ Product variants — size, color, attributes

✓ Soft delete on all major entities — recover data easily
